

Health and Social Care Workers' Quality of Working Life and Coping while Working during the COVID-19 Pandemic

Dr Paula McFadden Dr John Mallett Professor Jill Manthorpe

Dr Patricia Gillen Dr Heike Schroder Dr Jaclyn Harron

Dr John Moriarty Dr Jermaine Ravalier Dr Denise Currie

Aim and Method

Explore the impact of providing health and social care during the COVID-19 pandemic on nurses, midwives, Allied Health Professionals (AHPs), social care workers and social workers working in the UK.

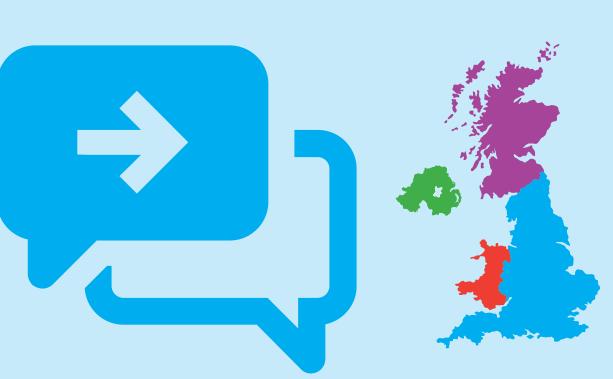

Online Survey open from 7th May 2020 - 3rd July 2020.

Focused on quality of working life, mental wellbeing and coping.

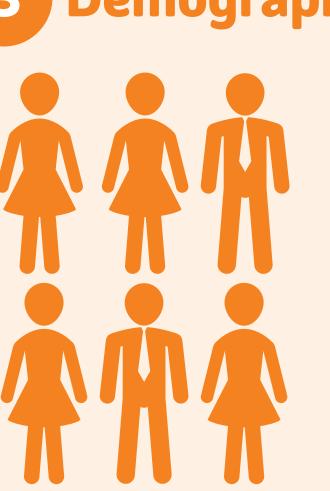

2 Overview of Respondents

3290 responses: 1897 from **Northern Ireland** 1062 from England 146 from Scotland 185 from Wales

Samples were: 1282 Social workers 1245 Social care workers **388 AHPs** 199 nurses 190 midwives

- Mostly Female
- Most worked in the Community
- Age 30-59 Over half worked with older people/other adults
- Band 6 pay band Occupational Groups

Changing Conditions

✓ Safety

✓ Work Routines/Redeployment

✓ Work Intensity

✓ Work/HomeLife

Safety

"I feel that risk is massively

undervalued and under discussed, with

regards to our own personal safety.

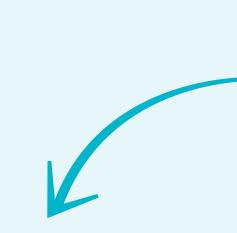

This has been highlight more under

Covid with regards to PPE...our PPE

did not reflect our role and the risk we

(England, Social Worker)

Social Worker)

Connections

✓ Employers ✓ Service Users ✓ Public - Clap for Carers

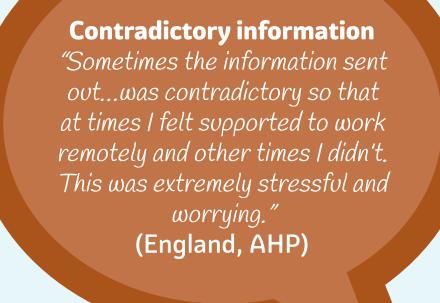

Communication

✓ Contradictory Information ✓ Sense of Isolation ✓ Frustration and Demoralisation

Employers

"We haven't heard of our manager barely at all through the pandemic. We have had no direction or advice on our job roles through this all." (Wales, Nursing)

Service Users

Social Care Worker)

"Service users all have learning disabilities, and some have no understanding of what's **Work Intensity** "We have been running with a going on or why they can't go to shops depleted team due to staff off etc. therefore results in frustration and challenging behaviour which can be stressful due to illness, shielding, stress for staff." due to the service demand." (Northern Ireland, (Northern Ireland,

Frustration

and Demoralisation . we had resuscitation protocols sent to vs... for someone with suspected COVID-19 It said if someone was collapsed to ring the call bell (where are call bells in patient homes??) to not attempt resuscitation until you were gowned in full PPE (which has to be done with a buddy and in the community we work alone and when this protocol came out we still didn't have any PPE to use). This is one of many examples where guidelines had been written by someone who has clearly never worked outside of the hospital setting and quite frankly it gets frustrating, demoralising and exhausting. (England, Nursing)

5 Ways of Coping Scores

There were significant differences across occupations in almost all coping mechanisms

Across all professional Groups - Active Coping, Acceptance, Positive Reframing and Planning showed higher mean scores

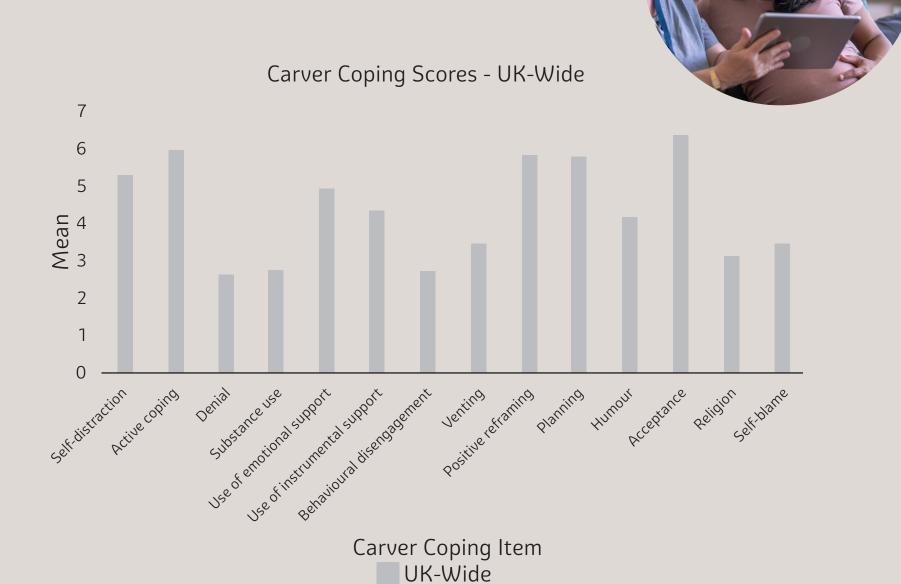

Nurses scored higher than all other

occupational groups on the use of Venting

AHPs scored higher than others on Religion

Wellbeing and Quality of Life

Data suggest that our sample had considerably lower wellbeing than the general population

> Overall mean wellbeing scores were slightly higher for the NI sample than UK

As people age, report higher wellbeing score

Males report higher level of wellbeing than females

8 Some Good Practice Recommendations

Employers should offer flexibility around working hours and location - including working from home

Some staff keen for more involvement in

decision-making and autonomy Connection with colleagues and managers

Visibility of management, either in person

or virtually

✓ Staff concerns for patient wellbeing need taken seriously

6 Wellbeing and Coping

Use of Active Coping, Emotional Support, Work Family Segmentation, Relaxation and Exercise predicted higher well being scores.

9% - likely range of anxiety and depressionfurther third in possible range

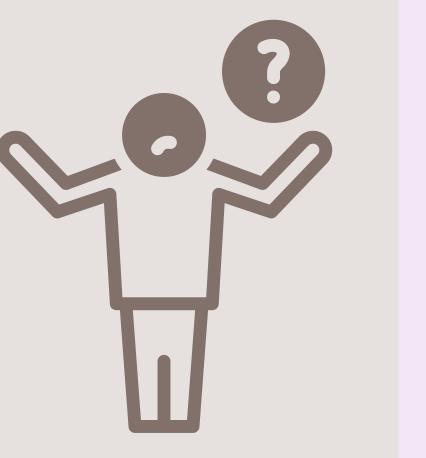

Respondents from England reporting higher quality of life than Wales, then NI

Work Related Quality of Life (WRQoL)

Lack of preparedness for redeployment also impacted on Work Related Quality of Life (WRQoL)

Number of sick days associated with lower
