22nd February 2021

Care/Patient Hotels

- * Medicalised Danish/Swedish model – less relevant for UK geography?
- * UK has explored care hotel model
- * Dutch model raised again in UK
- * Dominant rehabilitation focus – integration ambition for the UK – small chunks?
- * Watchwords around flexibility, family, changing needs – health led rather than care?

Place in the future of UK provision?

- * Co-location – opportunities in hospital - capital programme
- * Designated schemes – and rebirth of community hospital model
- * Enhanced Health in Care Home approach
- * Who Pays – Insurance, health?

Changes to care homes in future?

- * Demand driven – new national debate?
- * Large scale retrofit - Covid proofing – visiting, isolation, exits/entrances, bubbles, en suites, staffing facilities on site, IPC considerations – how to keep the home in care home?
- * Building regs – particularly around fire
- * New builds – households, units, modular capabilities, technology enabled (more virtual)
- * Staffing
- * Data and research driven
