Today

8 million
older adults
are
care-dependent

In Latin America and
the Caribbean

By 2050

Estimates
for older adult
who are
care-dependent

This represents

12%
of people aged
over 60 in
the region

Rise to over

**27
million**

RedCUIDAR+ The Long-Term Care Policy Network in Latin America and the Caribbean

Objectives

To support the region in the development of LTC policies and systems, while promoting gender equality, by

- (i) identifying common institutional, legal, financing and operational challenges in the region to provide care for older people;
- (ii) supporting the development of policies, programs and models of interventions to address such needs, and
- (iii) actively promoting the collection and dissemination of lessons learned.

RedCuidar+

- 25 countries
- 262 members

Concluding remarks

- In line with our Vision 2025: a great potential to generate employment and support women to continue to participate in the job market.
- Beyond RedCUIDAR+: we are working with countries in the region such as Colombia, Perú, Bolivia, Costa Rica, and Dominican Republic, to develop their care systems towards providing sustainable and equitable long-term care in Latin America and Caribe.
- Recovery from the COVID-19 crisis.

Thank you!
